Strategic Business Executive

12 november 2024, Liivo har varit kund till Lennart B.

Lennart was an outstanding performer in the product marketing videos for Weimer, showcasing a rare talent for translating complex technical concepts into clear, engaging content. His on-screen presence, combined with a deep understanding of the product, made him a natural fit for communicating detailed features in a simple, relatable way. Lennart's ability to break down intricate information and present it in an approachable manner resonated well with our audience and significantly enhanced the videos' effectiveness.

His charisma, clarity, and storytelling skills made even the most technical aspects easy to grasp. I highly recommend Lennart for any role requiring a skilled performer who can bring complex topics to life and connect with viewers.

Was a pleasure to work with on a
Christmas commercial. Lennart was
able to portray the character of Jolly
'Ol Saint Nick with a wide range of
energy and different takes that made
him very easy to direct on-set. Highly
recommended!

I brought on Lennart to a commercial project for cellphone manufacturer Ascom. He was charged with the task of portraying a creepy guy invading the privacy of a hotel employee. Although short, it's a memorable performance, and a tricky one. Lennart nailed it.

Without actually doing anything creepy or having screen time to reveal his creepiness, he just manages to convey the essence of someone you want to protect your daughters from (and I've got 5!).

In real life though, Lennart is anything but creepy. A true professional that'll bring +++ to your project. I'd be delighted to work with Lennart again! (See the film here: www.youtube.com/watch?v=H8YSE0ok3As).

I had the pleasure of working with Lennart during my graduation animation project. We were in need of a dramatic and emotional swedish voice-over and after seeing/hearing Lennart's showreel we knew he would be a great fit.

Overall, my experience working with Lennart was incredibly smooth. He responded really well to feedback and always offered suggestions based on his past experience which was really useful for us since we didn't have as much experience as him with directing voice-overs. In the end Lennart delivered more takes of the voice-over than expected which ended up being really useful for us since we could take different bits from each take to form our final voice over.
